**(Amounts in Thousands, Except Par Value and Earnings Per Share)**

---

**1. General Information**

Corporate Information

Republic Glass Holdings Corporation (the Parent Company) is a publicly-listed holding entity involved in purchasing, leasing, selling securities of every kind and business. On October 29, 2004, the Philippine Securities and Exchange Commission (SEC) approved the Parent Company's application for the extension of its corporate term, which expired on August 23, 2006, for another 50 years.

The registered office address of the Parent Company and its subsidiaries (collectively referred to as the Company) is 6th Floor, Republic Glass Building, 196 Salcedo Street, Legaspi Village, Makati City.

The Parent Company is 67.29%-owned by Gervel, Inc., the ultimate parent company, also incorporated in the Philippines.

---

**2. Basis of Preparation**

Basis of Preparation

The consolidated financial statements have been prepared in accordance with Philippine Financial Reporting Standards (PFRS). PFRS includes standards named PFRS, Philippine Accounting Standards (PAS) and Philippine Interpretations of International Financial Reporting Interpretations Committee (IFRIC) and Standing Interpretations Committee (SIC) issued by the Financial Reporting Standards Council (FRSC).

The consolidated financial statements have been prepared on a historical cost basis, except for available-for-sale (AFS) financial assets and financial instruments at fair value through profit or loss (FVPL) which have been measured at fair value. The parent company financial statements are presented in Philippine Peso, which is the Company's functional and presentation currency. All values are rounded to the nearest peso, except when otherwise indicated.

The functional currency of HML is the United States (US) Dollar. As of the reporting date, monetary assets and liabilities of this subsidiary are restated into the functional and presentation currency of the Company (the Philippine Peso) using the closing exchange rate at the reporting date and items in the statement of comprehensive income are translated at weighted average exchange rates for each month of the year. The exchange rate differences arising on the translation are reported as other comprehensive income in the consolidated statement of comprehensive income and taken directly as a separate component of equity as "Cumulative translation adjustments of a foreign subsidiary." On disposal of a foreign entity, the deferred cumulative amount recognized in equity relating to that particular foreign entity is recognized in the consolidated statement of income.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Parent Company and its wholly owned subsidiaries as at June 30, 2014 and December 31, 2013 and the period ended June 30, 2014 and 2013.

The consolidated subsidiaries (collectively referred to as "Subsidiaries") include the following:

Subsidiaries	Principal Activities	Place of Incorporation	Percentage of Ownership
RGC Investment Corporation (RIC)	Investing	Philippines	100
HML	Investing	British Virgin Island	100
RGC Marine Transport Corporation (RMTC)*	Shipping	Philippines	100

\* Ceased commercial operations in 1999.

The subsidiaries are fully consolidated from the date of acquisition, being the date on which the Parent Company obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting year as the Parent Company using consistent accounting policies. All intercompany balances, transactions, income and expense and profits and losses from intercompany transactions are eliminated in full.

---

### 3. Summary of Significant Accounting Policies

#### Changes in Accounting Policies and Disclosures

The Company applied, for the first time, PAS 19, *Employee Benefits (Revised)*, that require restatement of previous consolidated financial statements.

Several other amendments apply for the first time in 2013. However, they do not impact the Company's financial position and results of operations.

- PAS 19, *Employee Benefits (Revised)*
- PFRS 7, *Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities (Amendments)*.
- PFRS 10, *Consolidated Financial Statement*.
- PFRS 11, *Joint Arrangements*
- PFRS 12, *Disclosure of Interests in Other Entities*.
- PFRS 13, *Fair Value Measurement*.
- PAS 1, *Presentation of Financial Statements - Presentation of Items of Other Comprehensive Income (Amendments)*
- PAS 27, *Separate Financial Statements (as revised in 2011)*
- PAS 28, *Investments in Associates and Joint Ventures (as revised in 2011)* Philippine Interpretation IFRIC 20, *Stripping Costs in the Production Phase of a Surface Mine*.
- PFRS 1, *First-time Adoption of International Financial Reporting Standards – Government Loans (Amendments)*

*Annual Improvements to PFRS (2009-2011 cycle)*. The *Annual Improvements to PFRSs (2009-2011 cycle)* contain non-urgent but necessary amendments to PFRSs. The Company adopted these amendments for the current year.

- PFRS 1, *First-time Adoption of PFRS – Borrowing Costs*
- PAS 1, *Presentation of Financial Statements - Clarification of the requirements for comparative information*
- PAS 16, *Property, Plant and Equipment - Classification of servicing equipment*

- PAS 32, *Financial Instruments: Presentation - Tax effect of distribution to holders of equity instruments*
- PAS 34, *Interim Financial Reporting - Interim financial reporting and segment information for total assets and liabilities* .

#### Standards issued but not yet effective

Standards issued but not yet effective up to the date of issuance of the Company's consolidated financial statements are listed below. The Company intends to adopt those standards when they become effective. Except as otherwise indicated, the Company does not expect the adoption of these new and amended standards and interpretations to have significant impact on the consolidated financial statements.

- PAS 36, *Impairment of Assets - Recoverable Amount Disclosures for Non-Financial Assets (Amendments)*
- Investment Entities (Amendments to PFRS 10, PFRS 12 and PAS 27)
- Philippine Interpretation IFRIC 21, *Levies (IFRIC 21)*
- PAS 39, *Financial Instruments: Recognition and Measurement - Novation of Derivatives and Continuation of Hedge Accounting (Amendments)*
- PAS 32, *Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities (Amendments)*.
- PAS 19, *Employee Benefits – Defined Benefit Plans: Employee Contributions (Amendments)*  
ô The amendments apply to contributions from employees or third parties to defined benefit plans. .

*Annual Improvements to PFRSs (2010-2012 cycle)*. The *Annual Improvements to PFRSs (2010-2012 cycle)* contain non-urgent but necessary amendments to the following standards:

- PFRS 2, *Share-based Payment – Definition of Vesting Condition*
- PFRS 3, *Business Combinations – Accounting for Contingent Consideration in a Business Combination*
- PFRS 8, *Operating Segments – Aggregation of Operating Segments and Reconciliation of the Total of the Reportable Segments' Assets to the Entity's Assets*
- PFRS 13, *Fair Value Measurement – Short-term Receivables and Payables*
- PAS 16, *Property, Plant and Equipment – Revaluation Method – Proportionate Restatement of Accumulated*
- PAS 24, *Related Party Disclosures – Key Management*
- PAS 38, *Intangible Assets – Revaluation Method – Proportionate Restatement of Accumulated Amortization*

*Annual Improvements to PFRSs (2011-2013 cycle)*. The *Annual Improvements to PFRSs (2011-2013 cycle)* contain non-urgent but necessary amendments to the following standards:

- PFRS 1, *First-time Adoption of Philippine Financial Reporting Standards – Meaning of 'Effective PFRSs'*
- PFRS 3, *Business Combinations – Scope Exceptions for Joint Arrangements*
- PFRS 13, *Fair Value Measurement – Portfolio Exception*
- PAS 40, *Investment Property*
- PFRS 9, *Financial Instruments*
- Philippine Interpretation IFRIC 15, *Agreements for the Construction of Real Estate*

#### Current versus Noncurrent Classification

The Company presents assets and liabilities in the consolidated statement of financial position based on current/non-current classification. An asset is current when:

- It is expected to be realized or intended to sold or consumed in normal operating cycle
- It is held primarily for the purpose of trading

- It is expected to be realized within twelve months after the reporting period, or
- It is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as noncurrent. A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as noncurrent.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

#### Financial Instruments ó Initial Recognition and Subsequent Measurement

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

##### a. Financial Assets

*Initial Recognition and Measurement.* Financial assets are classified, at initial recognition, as FVPL, loans and receivables, held-to-maturity investments (HTM), AFS financial assets, or as derivatives designated as hedging instruments in an effective hedge, as appropriate. All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at FVPL, transaction costs that are attributable to the acquisition of the financial asset.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

The Company's financial assets include cash and cash equivalents, short-term investments, financial assets at FVPL, receivables, investment subject to a repurchase agreement, and AFS financial assets.

The Company has no HTM investments.

*Subsequent Measurement.* For purposes of subsequent measurement financial assets are classified in the following categories:

- *Financial Assets at FVPL.* Financial assets at FVPL include financial assets held for trading and financial assets designated upon initial recognition at FVPL. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments as defined by PAS 39. Financial assets at fair value through profit or loss are carried in the consolidated statement of financial position at fair value.

Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to

those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. Re-assessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss.

This category includes the Company's investment in corporate and government bonds, treasury notes and other equity securities.

- *Loans and Receivables.* Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortization is included in interest income in the consolidated statement of comprehensive income. The losses arising from impairment are recognized in the consolidated statement of comprehensive income in interest expense for loans and in costs of services or general and administrative expenses for receivables.

This category includes the Company's cash and cash equivalents, short-term investments, receivables, and investment subject to a repurchase agreement.

- *AFS Financial Asset.* AFS financial assets include equity investments and debt securities. Equity investments classified as AFS are those that are neither classified as held for trading nor designated at fair value through profit or loss. Debt securities in this category are those that are intended to be held for an indefinite period of time and that may be sold in response to needs for liquidity or in response to changes in the market conditions.

After initial measurement, AFS financial assets are subsequently measured at fair value with unrealized gains or losses recognized in OCI and credited in the AFS reserve until the investment is derecognized, at which time the cumulative gain or loss is recognized in OCI, or the investment is determined to be impaired, when the cumulative loss is reclassified from the AFS reserve to the consolidated statement of income in finance costs. Interest earned whilst holding AFS financial assets is reported as interest income using the effective interest rate method.

AFS equity investments whose fair value cannot be reliably measured are measured at cost less any impairment. If a reliable measure of fair value subsequently becomes available, the asset is remeasured at fair value, and the corresponding gain or loss is recognized in OCI (provided it is not impaired). If a reliable measure ceases to be available, the AFS equity investment is thereafter measured at cost, which is deemed to be the fair value carrying amount on that date. Any gain or loss previously recognized in OCI shall remain in equity until the asset has been sold, otherwise disposed of or impaired, at which time it is reclassified to profit or loss.

The Company evaluates whether the ability and intention to sell its AFS financial assets in the near term is still appropriate. When, in rare circumstances, the Company is unable to trade these financial assets due to inactive markets, the Company may elect to reclassify these financial assets if the management has the ability and intention to hold the assets for foreseeable future or until maturity.

For a financial asset reclassified from the AFS category, the fair value carrying amount at the date of reclassification becomes its new amortized cost and any previous gain or loss on the asset that has been recognized in equity is amortized to profit or loss over the remaining life of the investment using the effective interest rate. Any difference between the new amortized cost and the maturity amount is also amortized over the remaining life of the asset using the effective interest rate. If the asset is subsequently determined to be impaired, then the amount recorded in equity is reclassified to the consolidated statement of income.

This category includes the Company's investments in quoted and unquoted equity.

*Derecognition.* A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized (i.e. removed from the consolidated statement of financial position) when:

- The Company's rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognize the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

*Impairment of Financial Assets.* The Company assesses, at each reporting date, whether there is objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset (an incurred "loss event"), has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

- *Financial Assets Carried at Amortized Cost.* For financial assets carried at amortized cost, the Company first assesses whether impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment of impairment.

The amount of any impairment loss identified is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future expected credit losses that have not yet been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate.

The carrying amount of the asset is reduced through the use of an allowance account and the loss is recognized in profit or loss. Interest income (recorded as interest income in the consolidated statement of comprehensive income) continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. Loans, together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a write-off is later recovered, the recovery is credited to interest expense in the consolidated statement of comprehensive income.

- *AFS Financial Asset.* For AFS financial investments, the Company assesses at each reporting date whether there is objective evidence that an investment or a group of investments is impaired. In the case of equity investments classified as AFS, objective evidence would include a significant or prolonged decline in the fair value of the investment below its cost. "Significant" is evaluated against the original cost of the investment and "prolonged" against the period in which the fair value has been below its original cost. When there is evidence of impairment, the cumulative loss is measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that investment previously recognized in the consolidated statement of income and is removed from OCI and recognized in the consolidated statement of income. Impairment losses on equity investments are not reversed through profit or loss; increases in their fair value after impairment are recognized in OCI.

In the case of debt instruments classified as AFS, the impairment is assessed based on the same criteria as financial assets carried at amortized cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortized cost and the current fair value, less any impairment loss on that investment previously recognized in the consolidated statement of income.

Future interest income continues to be accrued based on the reduced carrying amount of the asset, using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. The interest income is recorded as part of finance income. If, in a subsequent year, the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the consolidated statement of income, the impairment loss is reversed through the consolidated statement of income.

#### b. Financial Liabilities

*Initial Recognition and Measurement.* Financial liabilities are classified, at initial recognition, as financial liabilities at FVPL, loans and borrowings, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

The Company's financial liabilities include accounts payable and other current liabilities, overdraft facility, customers' deposits and dividends payable.

The Company has no financial liabilities at FVPL or derivative liabilities designated as hedging instruments.

*Subsequent Measurement.* After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortization is included as interest expense in the consolidated statement of income.

*Derecognition.* A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statement of income.

c. Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

Fair Value Measurement

The Company measures financial assets at FVPL and AFS financial assets at fair value at each reporting date. Also, fair values of investment properties measured at cost and financial instruments measured at amortized cost are disclosed.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1  $\hat{o}$  Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2  $\hat{o}$  Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3  $\hat{o}$  Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between Levels in hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

#### Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of change in value.

#### Short-term Investments

Short-term investments include highly liquid investments that are readily convertible to known amounts of cash with original maturities of more than three months but not more than one year from dates of acquisition and are subject to an insignificant risk of change in value.

#### Investment Properties

Investment properties consist of parcels of land, other real estate properties, and furniture and fixtures which are being held by the Company for capital appreciation and for rental. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties, except land, are measured at cost less accumulated depreciation and impairment loss. Land is carried at cost less any impairment in value.

Depreciation is computed using the straight-line method over the following estimated useful lives:

Land improvements	5610 years
Buildings and improvements	10 years
Furniture and fixtures	365 years

The useful lives and method of depreciation are reviewed periodically to ensure that periods and method of depreciation are consistent with the expected pattern of economic benefits from items of the investment.

Investment properties are derecognized when either these have been disposed of or when the investment properties are permanently withdrawn from use and no future economic benefit is

expected from its disposal. Any gains or losses on the retirement or disposal of investment properties, which is measured as the difference between the sales proceeds and the carrying value of the investment property, are recognized in profit or loss in the year of retirement or disposal.

Transfers are made to investment properties when, and only when, there is change in use evidenced by ending of owner-occupation, or commencement of an operating lease to another party. Transfers are made from investment properties when, and only when, there is change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sell.

For a transfer from investment properties to owner-occupied property or inventories, the deemed cost of property for subsequent accounting is its carrying value at the date of change in use. If the properties occupied by the Company as owner-occupied properties become investment properties, the Company accounts for such property in accordance with the policy stated under property and equipment up to the date of change in use.

#### Property and Equipment

Property and equipment is stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and amortization and any accumulated impairment in value. Such cost includes the cost of replacing part of such property and equipment when that cost is incurred if the recognition criteria are met.

When each major repairs and maintenance is performed, its cost is recognized in the carrying amount of the property and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in the consolidated statement of income.

Depreciation is computed using the straight-line method over the following estimated useful lives:

Building and improvements	5640 years
Transportation equipment	4610 years
Furniture, fixtures and equipment	2610 years

The assets' residual values, useful lives and depreciation and amortization method are reviewed, and adjusted if appropriate, at each financial year-end.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of comprehensive income in the year the asset is derecognized.

Fully depreciated property and equipment are retained in the accounts until they are no longer in use.

#### Impairment of Nonfinancial Assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating units (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of

assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. In determining the fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies, or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. For longer periods, a long-term growth rate is calculated and applied to project future cash flows.

Impairment losses are recognized in profit or loss in the expense category consistent with the function of the impaired asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in profit or loss, unless the asset is carried at revalued amount, in which case the reversal is treated as a revaluation increase. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

#### Employee Benefits

*Defined Benefit Plan.* The net defined benefit liability is the aggregate of the present value of the defined benefit obligation at the end of the reporting date reduced by the fair value of plan assets, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuary.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income profit or loss.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in OCI in the period in which they arise.

*Employee Leave Entitlement.* Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. The undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period is recognized for services rendered by employees up to the end of the reporting period.

#### Equity

Capital stock is measured at par value for all shares issued. Incremental costs incurred directly attributable to the issuance of new shares are shown in equity as deductions from proceeds, net of tax.

Retained earnings represent the accumulated earnings, net of dividends declared.

Other comprehensive income comprises items of income and expense, including reclassification adjustments that are not recognized profit or loss as required or permitted by other PFRS.

Treasury stocks are the Parent Company's own equity instruments that are reacquired or held by a subsidiary which are carried at cost and are deducted from equity. No gain or loss is recognized in profit or loss on the purchase, sale, issuance or cancellation of the Parent Company's own equity instruments. Any difference between the carrying amount and the consideration are recognized in additional paid-in capital.

#### Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits associated with the transaction will flow to the Company and the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received excluding discounts, rebates and value-added tax (VAT) or duty. The Company assesses its revenue against specific criteria in order to determine if it is acting as principal or agent. The Company has concluded that it is acting as principal in all of its revenue arrangements. The following specific recognition criteria must also be met before revenue is recognized:

*Investment Income.* Revenue is recognized as the income accrues, taking into account the effective yield on the assets.

*Rental Income.* Revenue from investment properties is accounted for on a straight-line basis over the lease term.

*Dividend Income.* Revenue is recognized when the Company's right to receive the payment is established.

#### Cost and Expenses

Cost and expenses are decreases in economic benefits during the accounting period in the form of outflows or decrease of assets or incurrence of liabilities that result in decrease in equity, other

than those relating to distributions to equity participants. General and administrative expenses, interest expense and other expenses are recognized in profit or loss in the period these are incurred.

#### Leases

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement at the inception date or whether the fulfillment of the arrangement is dependent on the use of a specific asset or arrangement conveys a right to use the asset, even if that right is not explicitly specified in an arrangement.

*Company as a Lessor.* Leases where the Company retains substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Operating lease receipts from lessees are recognized as income in profit or loss on a straight-line basis over the lease term.

*Company as a Lessee.* Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as expense in profit or loss on a straight line basis over the lease term.

#### Taxes

*Current Tax.* Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in equity is recognized in equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

*Deferred Tax.* Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting income nor taxable income or loss
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward benefits of unused tax credits and any unused net operating loss carryover (NOLCO). Deferred tax assets are recognized to the extent that it is probable that taxable income will be available against which the deductible temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting income nor taxable income or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable income will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

*Value Added Tax.* Revenues, expenses and assets are recognized net of the amount of sales tax except:

- where the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the tax is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable; and
- receivables and payables that are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the tax authority is included as part of receivables or payables in the consolidated statement of financial position.

#### Foreign Currency-denominated Transactions and Translations

The Company's consolidated financial statements are presented in Philippine peso, which is also the Parent Company's functional currency. For each entity, the Company determines the functional currency and items included in the consolidated financial statements of each entity are measured using that functional currency.

*Transactions and Balances.* Transactions in foreign currencies are initially recorded by the Company's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Differences arising on settlement or translation of monetary items are recognized in profit or loss

with the exception of monetary items that are designated as part of the hedge of the Company's net investment of a foreign operation. These are recognized in OCI until the net investment is disposed of, at which time, the cumulative amount is reclassified to profit or loss. Tax charges and credits attributable to exchange differences on those monetary items are also recorded in OCI.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items measured at fair value is treated in line with the recognition of gain or loss on change in fair value of the item (i.e., translation differences on items whose fair value gain or loss is recognized in OCI or profit or loss are also recognized in OCI or profit or loss, respectively).

Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the spot rate of exchange at the reporting date.

*Foreign Operations.* On consolidation, the assets and liabilities of foreign operations are translated into Philippine pesos at the rate of exchange prevailing at the reporting date and the statement of income are translated at exchange rates prevailing at the dates of the transactions. The exchange differences arising on translation for consolidation are recognized in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognized in profit or loss.

#### Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event; it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is recognized in the profit or loss, net of any reimbursement. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provisions due to the passage of time is recognized as interest expense.

#### Contingencies

Contingent liabilities are not recognized in the consolidated financial statements but these are disclosed in the notes to consolidated financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but these are disclosed in the notes to consolidated financial statements when an inflow of economic benefits is probable.

#### Events after the Reporting Period

Post year-end events that provide additional information about the Company's financial position at the reporting period (adjusting events) are reflected in the consolidated financial statements. Post year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

#### Earnings per Share (EPS) - Basic/Diluted

Basic earnings per share is computed by dividing net income for the year by the weighted average number of issued and outstanding shares of stock during the year (adjusted for any stock

dividends). Diluted earnings per share is computed by dividing net income for the year by the weighted average number of issued and outstanding common shares during the year plus the weighted average number of common shares that would be issued on conversion of all the dilutive potential common shares into common shares. The calculation of diluted earnings per share does not assume conversion, exercise, or other issue of potential common shares that would have an anti-dilutive effect on earnings per share. Where the Company does not have any potential common shares or other instruments that may entitle the holder to common shares, diluted EPS is the same as basic EPS. The Company has no outstanding potential dilutive common shares.

#### Segment Reporting

The Company's operating businesses are organized and managed separately based on the sources of revenues, with each segment representing a strategic business unit that offers different products.

*Segment Assets and Liabilities.* Segment assets include all operating assets used by a segment and consist principally of cash equivalents, investments in financial instruments, investment properties, net of allowances and provision for decline in value. Segment liabilities include all operating liabilities and consist principally of accounts payable and other current liabilities.

*Inter-segment Transactions.* Segment revenue, segment expenses and segment performance may include transfers among business segments. The transfers, if any, are accounted for at agreed prices, normally at cost-plus basis. Such transfers, if any, are eliminated.

---

#### 4. **Significant Accounting Judgments, Estimates and Assumptions**

The preparation of the consolidated financial statements requires management to make judgments, estimates and assumptions that affect certain reported amounts and disclosures. In preparing the consolidated financial statements, management has made its best judgments, estimates and assumptions of certain amounts, giving due consideration to materiality. The judgments, estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances as of the reporting date. Actual results could differ from those estimates, and such estimates will be adjusted accordingly.

##### Judgments

In the process of applying the Company's accounting policies, management has made the following judgments which have the most significant effect on the amounts recognized in the consolidated financial statements:

*Determination of Functional Currency.* The Company has determined its functional currency to be the Philippine Peso. It is the currency of the primary economic environment in which the Company operates.

*Consolidation of Entities.* The Company has determined that it has control over its subsidiaries because it has (a) the power over the investee; (b) exposure, or rights to variable returns from its involvement with the investee; and (c) the ability to use its power over the investee to affect its return. Thus, the subsidiaries were included in the consolidated financial statements.

As at June 30, 2014 and December 31, 2013, the Company assessed that there were no relevant facts and circumstances that would indicate change over their control of the subsidiaries as a result of the adoption of PFRS 10 and PFRS 12.

*Recognition of Gain on Sale of Investment Properties.* The Company recognizes gain on sale of

investment properties when all of the following conditions under PAS 18, *Revenue*, have been satisfied:

- the entity has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

*Assessment of Impairment of AFS Financial Assets - Determination of Significant and Prolonged Decline in Fair Value.* The Company determines that an AFS financial asset is impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is significant and prolonged requires judgment. The Company determines that a decline in fair value greater than 20% of cost is considered to be a significant decline and a decline for a period of more than twelve months is considered to be a prolonged decline. In making this judgment, the Company evaluates, among other factors, the normal volatility in price. In addition, impairment may be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance.

*Valuation of Unquoted Equity Securities.* The Company's investments in equity securities that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are carried at cost, net of impairment, if any.

*Evaluation of Lease Commitments.* The evaluation of whether an arrangement contains a lease is based on its substance. An arrangement is, or contains a lease, when fulfillment of the arrangement depends on specific asset or assets and the arrangement conveys a right to use the asset.

The Company, as a lessor, has entered into commercial property leases on its investment properties. The Company has determined that it retains all the significant risks and rewards of ownership of these properties because of the following factors: (a) the lessee will not acquire ownership of the leased property upon termination of the lease; (b) at the inception of the lease, the present value of the minimum lease payments by the lessee is substantially lower than the fair value of the leased asset; and (c) the lessee has not given an option to purchase the asset at a price that is sufficiently lower than the fair value at the date the option becomes exercisable. Accordingly, the Company accounts for these as operating leases.

The Company, as a lessee, has entered into a lease contract covering its office space. The Company has determined that the lessor retains all the significant risks and rewards of ownership of the property and so accounts for the lease as operating lease.

#### Assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

*Estimation of Allowance for Doubtful Accounts.* The Company maintains an allowance for doubtful accounts at a level considered adequate to provide for potential uncollectible receivables. The level of allowance is evaluated by the Company on the basis of factors that affect the collectibility of the accounts. These factors include, but are not limited to, the length of the Company's relationship with the customers, average age of accounts and collection experience.

The Company performs a regular review of the age and status of these accounts, designed to identify accounts with objective evidence of impairment and provide the appropriate allowance for impairment losses. The review is accomplished using a combination of specific and collective assessment approaches. The amount and timing of recorded expenses for any period would differ if the Company made different judgments or utilized different methodologies.

In 2013, due to the lapse of the repurchase period, impairment loss amounting to ₱24.6 million was recognized. The impairment loss was based on the difference between the carrying amount and the present value of the estimated future cash flows computed using 4.05% discount rate over the period of 3 years. The related income arising from the investment was not accrued since it is not probable that the economic benefits associated with the transaction will flow to the Company. However, income will be recognized once the Company actually receives it.

*Assessment of Impairment of AFS Financial Assets - Calculation of Impairment Losses.* The Company expands its analysis to consider changes in the investee's industry and sector performance, legal and regulatory framework, changes in technology, and other factors that affect the recoverability of the Company's investments.

There was no impairment loss recognized in 2013, 2012 and 2011.

*Estimation of Useful Lives of Investment Properties and Property and Equipment.* The useful life of each of the Company's item of investment properties and property and equipment is estimated based on the period over which the asset is expected to be available for use. Such estimation is based on a collective assessment of similar businesses and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future financial performance could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of investment properties and property and equipment would increase the recorded operating expenses and decrease the carrying values of investment properties and property and equipment.

There was no change in the estimated useful lives of investment properties and property and equipment during the year.

*Assessment of Impairment of Nonfinancial Assets.* Impairment review is performed when certain impairment indicators are present. Determining the fair value of assets requires the estimation of cash flows expected to be generated from the continued use and ultimate disposition of such assets. The preparation of the estimated future cash flows involves judgment and estimations. While it is believed that the assumptions used in the estimation of fair values reflected in the consolidated financial statements are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable values and any resulting impairment loss could have a material adverse impact on the Company's financial performance.

*Determination of Retirement Costs.* The cost of defined benefit pension plans as well as the present value of the pension obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting period.

In determining the appropriate discount rate, management considers the interest rates of government bonds that are denominated in the currency in which the benefits will be paid, with extrapolated maturities corresponding to the expected duration of the defined benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific country and is modified accordingly with estimates of mortality improvements. Future salary increases and pension increases are based on expected future inflation rates for the specific country.

*Assessment of Realizability of Deferred Tax Assets.* The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred tax assets to be utilized. Unrecognized deferred tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that future taxable income will allow the deferred tax assets to be recovered.

---

## 5. Cash and Cash Equivalents

	2014	2013
Cash on hand and in banks	<b>₱8,446</b>	₱16,858
Cash equivalents	<b>818,962</b>	272,027
	<b>₱827,408</b>	₱288,885

Cash in banks earn interest at the prevailing bank deposit rates. Cash equivalents are made for varying periods of up to three months depending on the immediate cash requirements of the Company and earn interest at the prevailing temporary placement rates.

Interest income earned is presented as part of "Investment income" in the consolidated statements of income

---

## 6. Short-term Investments

Short-term investments are made for varying periods of more than three months but not more than one year depending on the immediate cash requirements of the Company and earn interest at the prevailing short-term investments rates.

Interest income earned is presented as part of "Investment income" in the consolidated statements of income.

---

## 7. Financial Assets at Fair Value through Profit or Loss

This account consists of quoted investments in corporate bonds, government bonds and treasury notes and other equity securities.

Interest income earned is presented as part of "Investment income" in the consolidated statements of income .

---

## 8. Receivables

	2014	2013
Accrued income from dollar and peso-denominated bonds and placements	₱6,980	₱6,724
Trade receivables	-	672,027
Miscellaneous deposits and others	1,546	1,522
Receivable from officers and employees	92	235
Others	4,036	4,027
	<b>12,654</b>	684,535
Less allowance for doubtful accounts	1,059	1,059
	<b>₱11,595</b>	₱683,476

#### 9. Other Current Assets

This account consist of miscellaneous deposits, input VAT, prepayment and other assets Input VAT will be utilized through application against the Company's output VAT. Input VAT has no expiration period.

Prepayments consist of prepaid rent and insurance.

Miscellaneous deposits and others mainly consist of a bond with the Department of Agrarian Reform in compliance with the Company's application for extension of time to develop a parcel of land it owns, rental, subscriptions and annual association dues.

#### 10. Investment Subject to a Repurchase Agreement

On February 26, 2008, under a Deed of Sale of Shares of Stock with Repurchase, the Company acquired unquoted corporate shares of stock of Stradcom Corporation (SC) from Stradcom International Holdings, Inc. (SIHI), a company incorporated in the Philippines, for a consideration amounting to ₱219.2 million for an ownership interest of 8%. The transaction includes a repurchase agreement wherein the shares acquired will be repurchased by SIHI in January 2013 at a price that will provide the Company with an effective annual yield of 20% per annum inclusive of cash dividends. It was also agreed that a sinking fund that can only be withdrawn in 2013, be established by SIHI for the purpose of complying with SIHI's obligation to repurchase the shares of stock from the Company.

The current information technology (IT) service provider of the Land Transportation Office (LTO), which is SC, is a subject of legal proceedings between parties claiming its ownership. Due to such legal proceedings, LTO has deferred its payment for the IT services received until ownership issue has been established.

In January 2013, SIHI was not able to repurchase the shares as provided in the agreement. SIHI had formally requested for extension of the repurchase date with an undertaking to pay interest by way of penalties at prevailing commercial rates until balance is fully settled. As of June 30, 2014, SC shares were not yet repurchased by SIHI.

Because of the present situation of SC, the Company did not accrue any income from such investment in 2013, 2012, and 2011. It will recognize the income when it will actually receive it.

---

### 11. Available-for-Sale Financial Assets

Investments in unquoted shares of stock represent unlisted corporate shares. In 2013, a total of 57.3 million common shares were acquired from Science Park of the Philippines (SPPI). These are carried at cost less any accumulated impairment losses, as their fair values cannot be reliably measured. The Company does not intend to dispose any of these in the near future.

---

### 12. Investment Properties

Investment properties consist mainly of parcels of land and other real estate properties, which are being held by the Company for capital appreciation and rental.

---

### 13. Accounts Payable and Other Current Liabilities

	2014	2013
Accounts payable and accrued expenses	837	₱1,256
Statutory liabilities	360	3,320
	<b>₱1,197</b>	<b>₱4,576</b>

Accounts payables are noninterest-bearing and are currently demandable.

Accrued expenses comprise of expenses incurred in the current year, which will not be paid off until after reporting date. Accrued expenses consist of accruals for utilities, salaries, wages and allowances, and various employee benefits.

---

### 14. Overdraft Facility

This pertains to a foreign-currency overdraft/revolving short-term advance facility (the Facility) with a bank. Interest rate charged per annum is at 1% plus charges for bank's cost of fund. Interest period ranges from 1 to 12 months.

Overdraft facility is secured by certain financial assets at FVPL. As stated in the Memorandum of Charge between the Company and the bank, all the Company's rights, title and interest in and to the securities and all dividends, distributions and interest thereon whether capital or income shall stand charged as a continuing security for the due payment by the Company to the bank of all sums and the satisfaction by the Company of all liabilities, present or future, actual or contingent, including liabilities as surety or guarantor, for which the Company is now or may hereafter be indebted or liable to the bank in any manner whatsoever and whether alone or jointly with any other person.

The Company executed a memorandum of charge in favor of the bank, in respect of securities financed wholly or partly with the Facility and/or such other securities as the bank may acquire and all accrual thereto and/or of all cash deposits placed with the bank.

---

### 15. Equity

Capital and Treasury Stock

The details of the Company's capital and treasury stock follows:

	Number of Shares Authorized	Number of Shares Issued and Outstanding	Cost
Capital stock - ₱1 par value	1,500,000	738,314	₱738,314
Less treasury stock:			
Parent Company's reacquired shares	ó	54,629	85,333
Parent Company shares held by a subsidary	ó	1,620	8,577
	1,500,000	682,065	₱644,404

#### Parent Company Shares Held by a Subsidiary

RIC, a wholly owned subsidiary, holds 1,620 common shares of the Parent Company issued shares as at June 30, 2014 and December 31, 2013. This is presented as part of "Treasury stocks" in the consolidated statements of financial position and consolidated statement of changes in equity.

#### Retained Earnings

Retained earnings are restricted from being declared as dividends to the extent of the appropriation for business acquisitions amounting ₱400 million and ₱100 million as at December 31, 2013 and 2012, respectively.

In December 2013, the Board of Directors approved to revert back the ₱100 million previous allocations to unappropriated retained earnings, and the set aside of ₱400 million for future investment purposes in shares of stocks and financial instruments. The Company is a holding company and its primary purpose involves the buying and selling of shares of stock. Accordingly the Company's investment portfolio in shares of stock and in the financial instruments may vary from time to time and increase or decrease depending on the available opportunities. Such opportunities and the timing thereof cannot be foreseen with precise exactitude but when they arise must be taken at full quickly and speedily before they are lost. The investment of the allocated reserve shall be completed within three (3) years from 2014 to 2017.

The Company declared dividends as follows:

Year	Date of Declaration	Date of Record	Date of Payment	Amount
2013	October 30	November 14	December 6	₱0.20
2012	September 21	October 25	November 22	0.30
2011	September 26	October 28	November 22	0.225

Dividends payable amounted to ₱27.8 million and ₱28.8 million as at June 30, 2014 and December 31, 2013, respectively.

The Company's issuance of stock happened only upon its initial public offering last July 17, 1959 with authorized number of shares equal to 80,000,000 shares being offered at ₱0.1 per share.

---

## 16. Related Party Transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. This include (a) enterprises that directly, or indirectly through one or more intermediaries, control or

are controlled by, or are under common control with, the Company; (b) associates; and (c) individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the Company and close members of the family of any such individual.

In considering each possible related entity relationship, attention is directed to the substance of the relationship, and not merely the legal form. The following transactions have been entered into with related parties:

Category	Year	Amount/ Volume of Transactions	Outstanding Balance	Terms	Conditions
<i>(Amounts in Thousands)</i>					
<b>Affiliate</b>					
MMC					
Lease payment	2014 (six months)	P524	P6	Not applicable	Not applicable
	2013 Full year	P915	P6	Not applicable	Not applicable

## 17. Financial Instruments

### Financial Risk Management Objectives and Policies

The Company's principal financial assets comprise cash and cash equivalents, short-term investments, financial assets at FVPL, investment subject to a repurchase agreement, and AFS financial assets. The main purpose of these financial assets is to earn income for the Company's funds and finance the Company's operations. The Company's other financial instruments are receivables, accounts payable and other current liabilities and overdraft facility, which arise directly from its operations.

The main risks arising from the Company's financial instruments are market risk (interest rate risk, equity price risk and foreign currency risk), credit risk and liquidity risk. The BOD reviews and approves the policies for managing each of these risks which are summarized below.

### Market Risk

Market risk is the risk that the fair value of future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rate, foreign exchange rates and equity prices.

*Interest Rate Risk.* Interest rate risk arises from the possibility that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company's exposure to risk for changes in interest rates relates primarily to the Company's investments in debt securities at FVPL. These financial assets are fixed rate financial instruments. Accordingly, the Company is not subject to cash flow interest rate risk but is only subject to fair value interest rate risk. Interest on these financial instruments is fixed until maturity of the instruments. The Company adopts a policy of managing its interest rate exposure by maintaining an investment portfolio mix of diverse terms.

*Equity Price Risk.* Equity price risk is the risk that the fair values of investments in equity securities decrease as the result of changes in the levels of equity indices and the value of individual shares.

The Company manages equity price risk through diversification and placing limits on individual and total equity investments. The Company's BOD reviews and approves all equity investment decisions.

The effect on income before income tax (as a result of a change in fair value of equity instruments classified as financial assets at FVPL) due to a reasonably possible change in equity indices, with all other variables held constant, is as follows:

*Foreign Currency Risk.* Foreign currency risk arises from the possibility that future cash flows of financial instruments will fluctuate because of changes in foreign currency exchange rates.

The Company's exposure to foreign currency risk relates primarily to certain foreign currency-denominated cash and cash equivalents, financial assets at FVPL, and overdraft facility. To manage future currency risk, the Company considers the trend in the movement of foreign currencies in acquiring foreign currency-denominated investments and enters into derivative contracts.

*Credit Risk.* Credit risk arises when a customer or counterparty fails to discharge an obligation and cause the Company to incur a financial loss.

The Company trades only with recognized, creditworthy third parties. It is the Company's policy that the BOD approves on major transactions with third parties. In addition, receivable balances are monitored on an ongoing basis with the result that the Company's exposure to bad debts is not significant.

With respect to credit risk arising from the other financial assets of the Company, which comprise cash and cash equivalents, short-term investments, financial assets at FVPL, miscellaneous deposits, investment subject to a repurchase agreement and AFS financial assets, the Company's exposure to credit risk arises from default of the counterparty, with maximum exposure equal to the carrying amount of these instruments. The Company manages these financial assets by transacting only with recognized third parties.

Since the Company transacts only with recognized third parties, there is no requirement for collateral.

The aging analyses of the Company's financial assets are as follows:

2014										
June 30, 2014	Neither Past Due	Past Due but not Impaired					Individually		Total

\* Excluding Cash on hand

## Item 2 ó Management's discussion and analysis of financial condition and Results of Operations:

The Company's total assets as of June 30, 2014 amounted to P1.87 billion, of which P1.32 billion or about 99% of total current assets were mostly in bonds, government securities, and cash reserves. Cash and Cash Equivalents, short-term investments and FAFVPL improved by about 69% from P782.89 million as of December 31, 2013. Receivables, Deposits, Prepayments and other current assets totaled P13.02 million, of which 54% or P6.98 million representing interest receivables. The Company collected in January this year P672.03 Million representing the final installment on sale of parcels of land to a local company. Stockholders' Equity stood at P1.79 billion or a slight expansion relative to December 31, 2013's P1.78 billion.

The Company is not aware of any event that may trigger direct or contingent material financial obligations, default or acceleration of any obligations. Also, there were no material off-balance sheet transactions, arrangements, obligations (including contingent obligations), relationships of the company with unconsolidated entities or other persons created during the reporting period that has not been reflected in June 30, 2014 Financial Statements.

### Results of Operations

The Company registered a net income of P14.68 million, lower compared to 2013's same period performance of P124.03 million. The decline in net income was due significantly from the gain on sale of investment properties of P166.23 million in first quarter of 2013. Investment /Interest income decreased to P37.38 million from P44.89 million registered in the same period last year. General and administrative expenses totaled P32.36 Million.

The following are the key performance indicators considered by the Company:

Indicator	Calculation	June 30, 2014	June 30, 2013	December 31, 2013
<b>Liquidity</b>				
Current ratio	Current Assets / Current Liabilities	35.55	5.83	24.47
<b>Solvency</b>				
Debt to equity	Total Debt / Stockholders' Equity	0.05	0.13	0.13
<b>Leverage</b>				
Debt to total assets	Total Debt / Total Assets	0.05	0.11	0.11
<b>Interest Rate Coverage</b>	EBIT/ Interest expense			
<b>Profitability</b>				
Net profit ratio	Net Income / Revenue	39.18%	58.31%	66.83%
Return on total assets	Net Income / Total Assets	0.78%	7.82%	31.04%
Return on equity	Net Income / Stockholders' Equity	0.82%	8.80%	35.02%
Earnings per share	Net Income / Weighted Average No. of Shares Issued and Outstanding	0.02	0.18	0.91

### Other Matters:

- |   |   |  |
|---|---|--|
| A | Any Changes in accounting policies and methods of computation in interim financial statements as compared with the most recent annual financial statements or, if those policies or methods have been changed, a description or the nature and effect of the change | None   |
| B | Explanatory comments about the season ability or cyclicity of the interim operations  | None   |
